

SFEI Watershed Priorities

High Priority

- o Upper Penitencia
- o Guadalupe River
- o Walker Creek
- o Alameda Creek
- o Napa River

Medium Priority

- o Sonoma Creek
- o Fitzgerald Marine Reserve
- o Wildcat Creek
- o Coyote Creek
- o Miller Creek
- o Diablo

All non-tidal polygon quads have passed QA/QC

The USGS standard quads are 7.5 min x 7.5 min. There are 111 such quads in our study area. However, five of these quads along the coast have very minimal land to map. We therefore consolidated those five into adjacent quads. When we take this into account, the total number of quads for the project is 106.
